Anatole Investment Management Limited

Position: Data Analyst Intern
Location: Central, Hong Kong
Start Date: Immediately

Responsibilities:
- Manage the fundamental research database, consisting of both structured and unstructured datasets
- Help use machine learning algorithms to mine, clean, and organize large and complex alternative data sets
- Collaborate with the CIO and investment team to use data sets to generate deeper research insights and to better inform investment decisions
- Assist with ad-hoc data analysis as required

Qualifications:
- Currently a graduate student in computer science, statistics, math, and/or engineering
- Strong knowledge of statistical, mathematical, and financial theory with exceptional problem-solving skills
- Advanced programming in Java/C++/Python and some exposure to machine learning and optimization techniques
- Interest in financial markets
- Strong interpersonal and communication skills and high attention to detail
- Fluent in English and Mandarin Chinese
- Flexibility to work during the school year, for at least 10-15 hours a week

This is an exciting entry point into the hedge fund space and a unique opportunity to work with some of the best investors in the industry. For the successful candidate, this may lead to a full-time position with the firm if performance expectations are met.
